

1 DR. TEMPLETON: Well, I thought I heard Mr. Case
2 include Ober Law in his motion. It is not acting on the
3 Ober Law?

4 THE CHAIRMAN: No.

5 MR. CASE: Let me clarify it.

6 DR. TEMPLETON: I would appreciate it.

7 MR. CASE: What I am saying is I think a
8 favorable vote on the Committee's recommendation, and I
9 really don't know how I would vote on it, could easily be
10 construed as a recommendation by this Commission against
11 the provisions of the Ober Law, and because even though
12 the Committee does say that they think as a practical
13 matter through the mechanism of the oath-taking that the
14 substance would be preserved, this is a very tough concept
15 to put across, and I think that it is so vital that a full--
16 the full Commission ought to be here to vote on it. We have
17 here today 40 per cent absent.

18 DR. TEMPLETON: Yes.

19 MR. CASE: And I think that this ought to be
20 deferred until we have a, really a representative group.

21 THE CHAIRMAN: Dr. Jenkins.
